AIMING TO SIMPLIFY

Welcome to the 2007

TCC

Aiming to Simplify

Everything is set for The Teaching and Coaching Event of the Year. The 8th **Teaching and Coaching Conference** hosted by the PGA of Sweden at The Convention Centre in the City of Malmo. You will meet some of the world's most prominent speakers. The topic of the TCC was chosen as a start to a discussion around how we teach and coach. Are we making Golf too complex for its own good?

With all the new technical data and new and more precise information that we get from all the new technology. How does that change the way we teach or think around teaching and coaching?
How shall I as a golf teacher/coach/Professional handle this information so we use it to make the players perform better?

**Once you stop aiming to be better professional you also stop being good.
Be there and become a better professional.**
